

1. The regeneration of 72 Château-du-Roi Street

Summary Château-du-Roi Street is the laboratory for the urban development public project: 'Cahors, the Heart of the Agglomeration Strategy'. Here are tested all the policies implemented in this framework, before being used in other City neighbourhoods or in the smaller towns of the Grand Cahors Agglomeration. The 72 on Château-du-Roi Street is a very old...

2. The experimental rehabilitation of a demonstrator building, part of the ENERPAT SUDOE program

Summary Located in the heart of the historic city center of Cahors, the demonstrator building was created by fusing two adjoining buildings: one older on Saint James Street, the other more recent on Petit Mot Street. These two buildings, originally built in the 13th-14th centuries, have been remodeled over time. However, they are dilapidated and...
