

The city of Sigulda (LV) has created an excellent multi-purpose space in the Sigulda Castle Complex.

In these video, we can listen to the experience of different merchants, such as Elizabete (with a ceramic workshop), Marina (producing leather artist), Antra (with a walking stick workshop) and Zinaida (with a paper art workshop). Everyone is grateful that this project has allowed merchants to produce and sell their products in their place of residence. Local residents and tourists appreciate their products and permit them to live at home in a comfortable way.
